PROFESSIONAL SUMMARY

Software Developer with hands-on experience building and maintaining AI-powered applications using Python, large language models (LLMs), and REST APIs. Skilled in Retrieval-Augmented Generation (RAG) with LangChain and LangGraph, prompt engineering, and writing clean, well-tested, well-documented code in Agile teams. Backed by a strong SQL and full-stack (Java, Spring Boot, Angular) foundation and a track record of shipping production features and resolving performance issues.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, SQL

AI / LLM: Retrieval-Augmented Generation (RAG), LangChain, LangGraph, LLM & API Integration, Prompt Tuning & Engineering, PyTorch, Transformers

Databases: SQL, PostgreSQL, MySQL, MongoDB, Firebase, ChromaDB (Vector DB)

Frameworks: Spring Boot, Spring MVC, Spring Data JPA, Angular, React, Django, RxJS

Testing & Tools: Unit Testing, Integration Testing, Technical Documentation, Agile / Scrum, Git, GitHub, Docker

PROFESSIONAL EXPERIENCE

Tata Consultancy Services Ltd. **Mumbai, India**
Assistant Systems Engineer | AI & Full-Stack Developer Jan 2026 – Present

- Develop and maintain a Python-based Retrieval-Augmented Generation (RAG) application for the Sony Pictures account, integrating LLMs and REST APIs to deliver cut-wise and territorial film analysis via a conversational chatbot.
- Won 1st place at the TCS AI Fridays Hackathon by building an AI solution in Python with RAG, LangChain, and LangGraph that consolidates data from multiple sources and recommends optimized routes to minimize delays.
- Write clean, maintainable code with unit and integration tests and technical documentation across Python, Spring Boot, and Angular within an Agile workflow.
- Awarded Best Team for outstanding, results-driven contribution and collaborative delivery of client engagements.

PROJECTS

SQLInspector – Django Middleware | Python, SQL, Django

- Built a Python/Django middleware that captures and analyzes SQL queries in real time to surface database performance bottlenecks.
- Exposed Django ORM interactions to identify and help resolve inefficient queries, improving database operation efficiency.

Small Language Model (SLM) | Python, PyTorch, Transformers

- Built a GPT-style Small Language Model from scratch in PyTorch, implementing transformer blocks, causal self-attention, and custom token embeddings.
- Designed an end-to-end training pipeline featuring dataset tokenization, memory-mapped batching, mixed-precision training, and cosine learning-rate scheduling.
- Trained and evaluated the model on the TinyStories dataset, optimizing loss convergence and validating performance with train/validation metrics.

StudyBuddy – Android App | Java, Retrofit, REST APIs

- Developed a collaborative study app, integrating REST APIs via Retrofit, dynamic RecyclerView interfaces, and ZXing QR-code scanning for session and group management.

EDUCATION

Vellore Institute of Technology (VIT), Vellore, India 2021 – 2025
Bachelor of Technology in Electrical and Electronics Engineering

LEADERSHIP & INVOLVEMENT

School of Electrical Engineering (SELECT), VIT - Design Head Oct 2024 – Jul 2025

- Led the creation and redesign of the SELECT newsletter and high-visibility promotional materials, including a QS World Ranking poster, engaging 10,000+ stakeholders.

CodeChef VIT Chapter — Senior Core Member Mar 2022 – Jan 2024

- Led technical training sessions on Git/GitHub and Flutter, reaching 150+ live participants and 900+ recorded viewers through live sessions and documentation.
